1. Contents

survey questionnaire

2.time

2.1 Reference period

2020/11/30-3/1

2.2 date of publication

2022/5/30-4/1

2.3 Commitment to publish

2022/5/30

2.4 Repetition

annual

time series available 2010-2020

3. Accuracy level

3.1 Total accuracy

very high

3.2 sources of inaccuracy

non-preview errors

3.3 Available accuracy metrics

Descriptive accuracy metrics

4.comparasion

4.1 Comparison over time

This data is comparable with previously produced data due to the use of the same methodology

and the application of international standards

4.2 Comparison with other statistics

This data is comparable with other statistics that use the same international definitions and classifications

5. Access to data

5.1 Publication Format

The data is published in paper and electronically on the website of the Department of Statistics
