Department of Statistics, as per law no. 12/2012.

## **1. Contents**

### **1-1 Content description**

This survey provides detailed data on the various characteristics of individuals in general, and on the demographic, social and economic characteristics of individuals who underwent a change in their economic conditions (changed their profession/job or got a new employment, or left their own work for some reason).

### **3-1 variables**

Variables include the following:

- Identification data per individual
- Demographic data
- Educational data
- Economic data
- Number of individuals who (changed/left/or got) an employment.

### **4-1 Classifications (basis of details in the tables)**

Published tables are based on publishing the data according to the net job opportunities created according to the demographic, social and economic characteristics.

## **2- Time**

### **2-1 reference period (during which the data is collected)**

The survey was conducted throughout the whole months of the year (01/01/ - 31/12) 2014

### **2-2 date of dissemination**

First round 2014 / date of dissemination 25/04/2015

Second round 2014 / date of dissemination 20/09/2015

### **3-2 commitment to date of dissemination**

Publication is carried out immediately upon the completion of office preparation for each round.

### **4-2 periodicity**

Biannual

### **5-2 availability of time series (mention available time series of this survey)**

There is a time series of annual surveys from 2008 – 2014.

## **3- Accuracy**

**3-1 overall accuracy (very high if all items in checklist are implemented, high if two thirds are implemented, medium if less than half the items are implemented)**

Very high

### **3-2 sources of inaccuracy**

Errors of lack of inspection

### **3-3 available accuracy measures**

Descriptive accuracy measures

## **4- Comparability**

### **4-1 comparability over time (ability to compare data with previously published data)**

The data is comparable with previously published data, due to using the same methodology and application

of international standards relative to the employment and unemployment.

**4-2 comparability with other statistics (ability to compare data with figures in other surveys, and with other countries)**

The data is comparable with other statistics, which use the same international standards and classifications relative to employment and unemployment.

**5- Data accessibility**

**5-1 publication formats (how can the user access the data, e.g. DOS website, paper copies, etc..)**

The data is published in printed and electronic format on DOS website.
